

THE KITCHEN BY COOKING WITH QUE

— DETROIT, MICHIGAN —

PROJECT SPECS

· 1,600 Sq. Ft.

PROJECT DESCRIPTION

Fieldstone A&E design transformed the vacant storefront into a bright, fresh home for Que's demonstration kitchen, vegan cafe and video productions. The display kitchen and viewing area with bar seating are the focus of the space, but retail fixturing is integrated to accommodate branded merchandise. A full commercial kitchen behind the scenes can prepare the demonstrations and support outside catering.

The complimentary materials, attractive lighting, and colors (primarily executed in Italian ceramic tile) bring this project to life and enhance the Cooking with Que brand.

FIELDSTONE A&E ROLE:

- Design Concept through Grand Opening
- Architecture including handling code issues
- Interior Design including commercial kitchen and heavy equipment
